Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. Claims 32-33 are canceled. See, applicant's amendment, on page 6, mailed March 11, 2009.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 32-35 are rejected under 35 U.S.C. 102(e) as being anticipated by Bode et al. (U.S. Patent 6,184,824).

The claimed invention reads on Bode et al. as follows:

Regarding claim 32, Bode et al. discloses a method (abstract and fig. 4) in a satellite positioning system (fig. 1) enabled wireless communication station (fig. 5), the method comprising: receiving a satellite positioning system navigation data issue identifier at the satellite positioning system enabled wireless communication station (col. 3 lines 20-37), the satellite positioning system navigation data issue identifier comprising a data frame (field)(col. 3 lines 23-33); identifying position/absolute time

(data issue) associated with a particular satellite identifier using the satellite positioning system navigation data issue identifier (col. 3 lines 20-37).

Regarding claim 34, Bode et al. discloses a satellite positioning system (fig. 1) enabled wireless communication station (fig. 5), the method comprising: receiving a satellite positioning system navigation data issue identifier at the satellite positioning system enabled wireless communication station (col. 3 lines 20-37), the satellite positioning system navigation data issue identifier comprising a data frame (field)(col. 3 lines 23-33); identifying position/absolute time (data issue) associated with a particular satellite identifier using the satellite positioning system navigation data issue identifier (col. 3 lines 20-37).

Regarding claims 33-35, Bode et al. discloses identifying the data issue associated with the particular satellite using the data frame (field) sub-frame of the satellite positioning system navigation data issue identifier)(col. 3 lines 23-33).

Allowable Subject Matter

4. Claims 1-10, 25 and 26 are allowed.
5. The following is a statement of reasons for the indication of allowable subject matter: Upon close review of the claims, the prior art of record and the Notice of Allowance mailed December 11, 2008, it appears that the allowance of claims 1-10,25 and 26 is appropriate.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chen et al. (U.S. Patent 6,611,756) discloses a method for predicting navigation information in a global positioning system (fig. 14) comprising a GPS receiver (fig. 13) for predicting navigation data (col. 4 line 64 through col. 5 line 14), wherein the navigation information comprise frames including satellite identifiers, navigation data bits and parity bits (col. 5 line 57 through col. 6 line 40).
